

SHADOW BOARD & VISUAL MANAGEMENT LOOKBOOK

2026 EDITION

Custom shadow boards, separation screens and visual aids — designed by a team that runs sanitation programs every day.

CAVANTO SOLUTIONS | EHS DIVISION

Dallas–Fort Worth & North Texas · (972) 482-5845 · cavantousa.com

A PLACE FOR EVERY TOOL, AND EVERY TOOL IN ITS PLACE

Shadow boards turn tool control into something anyone can see.

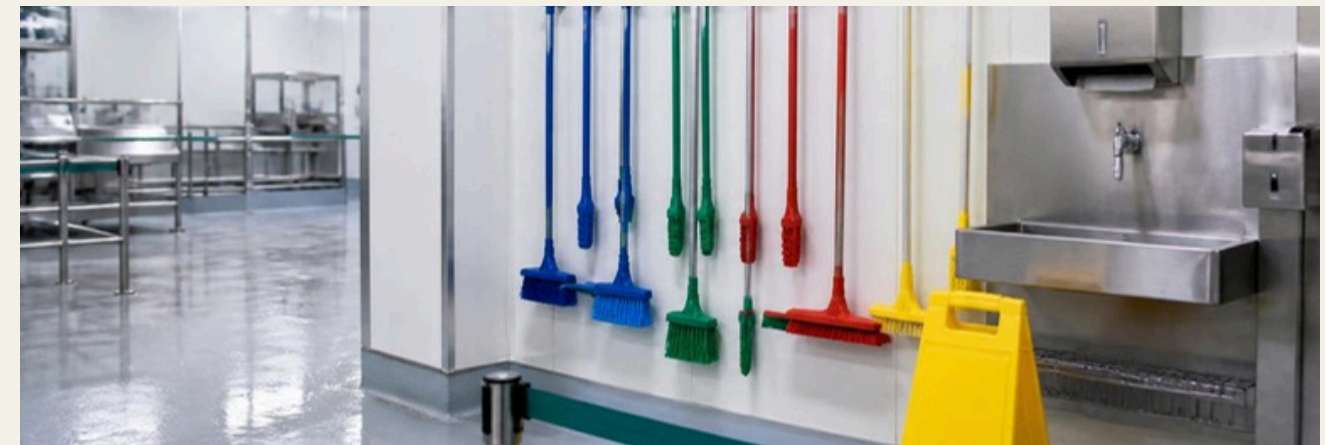

SEE IT AT A GLANCE · KEEP ZONES SEPARATE · SAVE TIME EVERY SHIFT · SHOW CONTROL FOR 5S, GMP AND SANITATION

WITHOUT

Missing? Mixed? Misplaced?

WITH VISUAL CONTROL

At-a-glance accountability

Where they work: food and beverage plants · schools and universities · gyms and sports facilities · warehouses · clinics and labs · offices

WHAT GOES ON A CAVANTO SHADOW BOARD

Laid out from your actual tools and your sanitation procedure.

01 TOOL SHADOWS + BILINGUAL LABELS

Every tool has a marked outline and a label in English and Spanish. An empty shadow means a tool is missing.

02 ZONE COLOR, BOARD ID + TOOL COUNT

Frame and hooks in the zone color, with an ID and tool count that match your SSOP and audit records.

03 YOUR LOGO, AREA NAME + QR CODE

Your branding and area name up top, plus a QR code that opens the SSOP, a training video or a reorder sheet.

FIVE WAYS TO MOUNT A BOARD

Every configuration can be built in any of these styles.

WALL-MOUNTED

A fixed home at the point of use

MOBILE

Rolls to the line, then back to storage

DOUBLE-SIDED

Two boards on one mobile footprint

MAGNETIC

Steel cabinets, carts and frames

LOCKABLE CABINET

QA instruments and high-value tools

FOOD PLANT BOARDS

CONFIGURATION GALLERY 1 OF 2

SANITATION STATION

Squeegees, deck brushes, shovels and scrapers for one hygienic zone, at the wash bay or zone entrance.

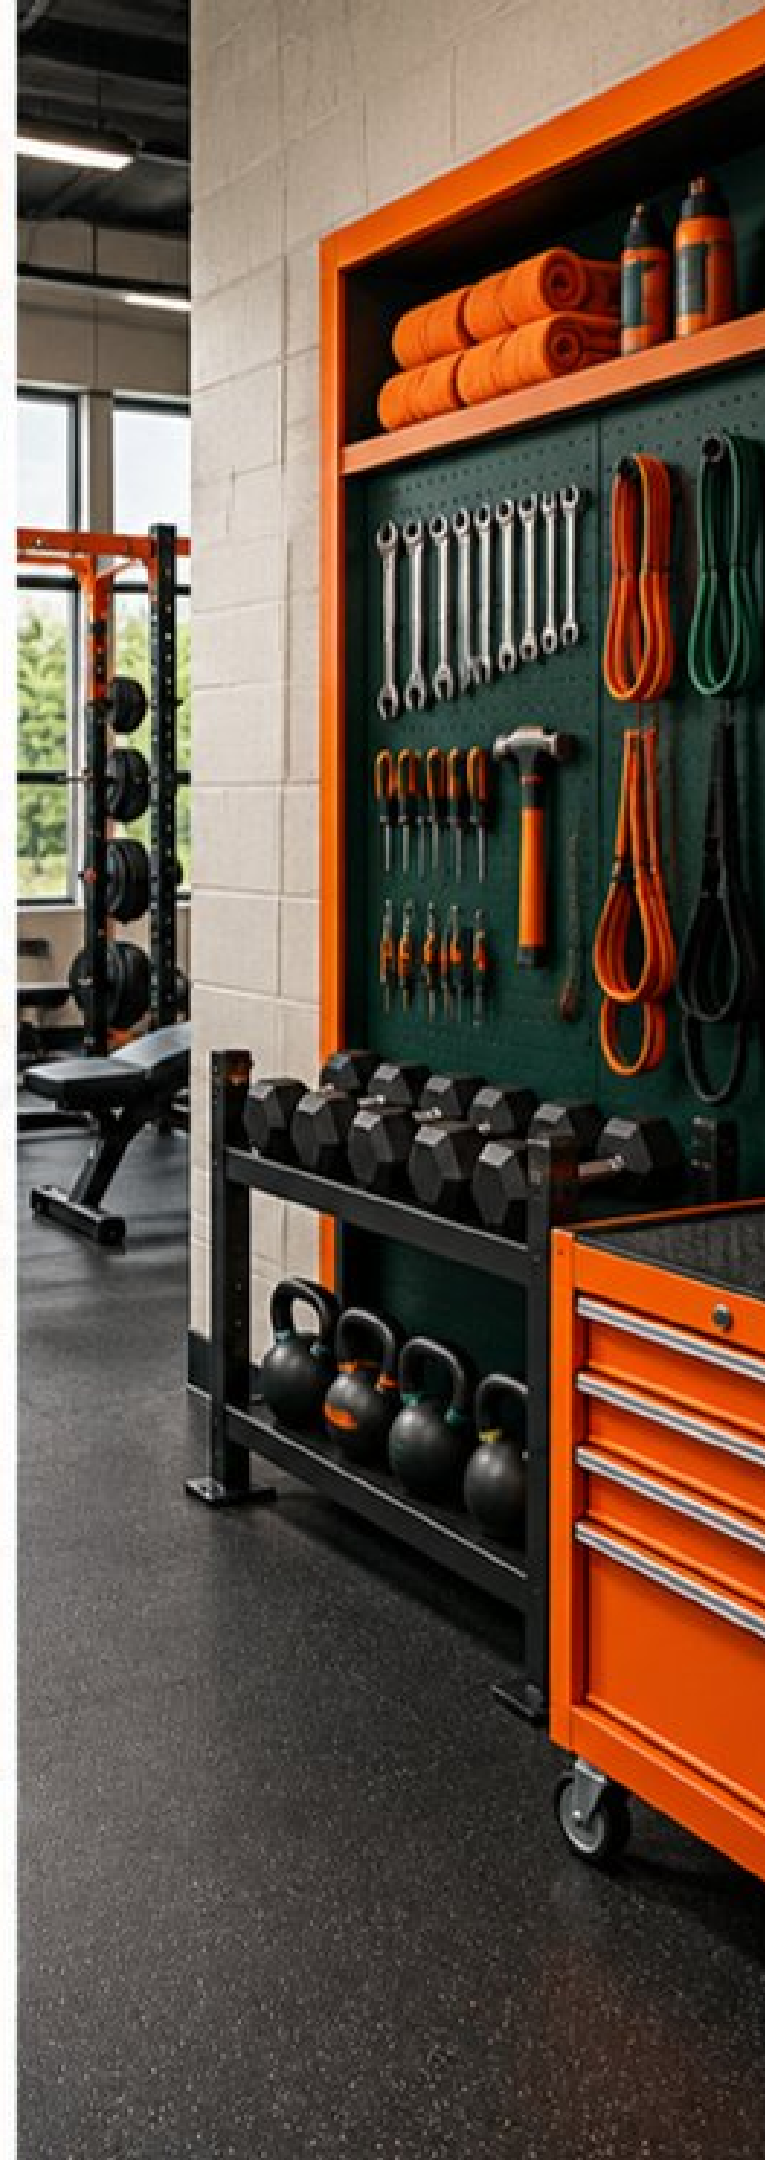

ALLERGEN CHANGEOVER KIT

Dedicated brushes, scrapers and swabs used only for changeovers, line-side or on a mobile board.

MAINTENANCE TOOL BOARD

Hand tools assigned to a line, so nothing is left inside equipment after repairs.

QA, CUSTODIAL & FACILITY BOARDS

CONFIGURATION GALLERY 2 OF 2

CUSTODIAL CLOSET

Restroom tools kept apart from general cleaning tools by color, for schools, offices and clinics.

QA VERIFICATION BOARD

ATP meter, swabs, thermometer and pre-op log in one place, in the QA office or a lockable cabinet.

FACILITY CARE BOARD

Floor and surface care tools for gyms, schools and common areas.

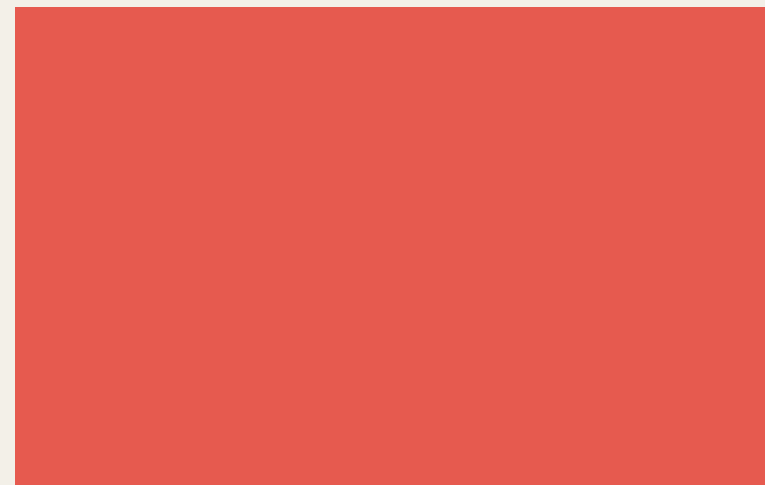

ONE COLOR PER ZONE, MATCHED END TO END

There is no single required color standard. We match the program you already have — or help you write one — and carry it through the board, hooks, tools and signage.

BLUE

General food-contact cleaning

RED

**Raw product areas or
restrooms**

GREEN

Ready-to-eat or food service

YELLOW

Restroom sinks and counters

EXAMPLES ONLY. Also common: purple for allergen changeover tools, black or gray for floors and drains. Your food safety plan and color program decide the colors.

BUILT FOR THE ROOM IT LIVES IN

Materials, sizes and mounting are chosen for wet, cold, dusty or busy areas. Exact specifications and lead times are confirmed in your written quote.

WE DON'T RECOMMEND PAPER OR FOAM-CORE BOARDS IN WET OR FOOD AREAS.

WET / WASHDOWN

Rigid polymer panels, sealed edges, standoff mounting

COLD

Moisture-resistant panels, stainless hooks and hardware

DUSTY / DRY

Aluminum composite with crisp printed graphics

HIGH-TRAFFIC

Stainless frames, mobile carts, heavy-duty hooks

MADE FOR YOUR FACILITY, NOT A CATALOG

Customization starts with what is already real: your tools, your workflow, your walls and your people.

YOUR LOGO + COLORS
On every board, sign and screen

AREA + ZONE NAMES
Matched to your floor plan

BILINGUAL LABELS + QR CODES
English and Spanish, linked to your SSOPs

BOARD IDS + ANY TOOL SHAPE
Outlined from the real item or a photo

BEYOND THE BOARD

Visual management across the whole floor — in the same colors, languages and branding.

LINE STATUS BOARDS

ZONE SIGNS + FLOOR MARKING

VISUAL SSOP CARDS

WET-FLOOR + SAFETY SIGNS

BARRIERS + SCREENS

BILINGUAL BY DEFAULT

PARTITION THE ZONE. CONTROL THE RISK.

Modular screens, washdown curtains and belt barriers, printed with your logo and artwork.

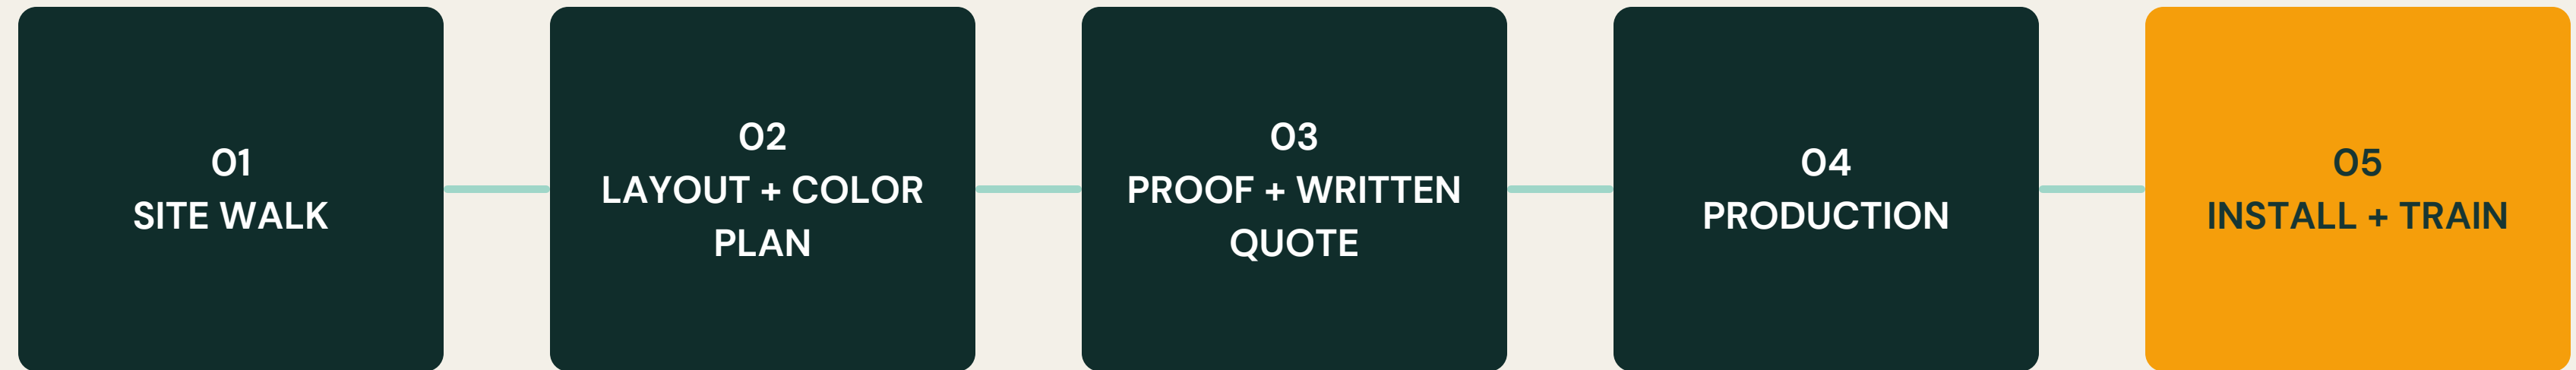

CUSTOM SIZE • CUSTOM ARTWORK • WASHABLE OPTIONS

- Separate ready-to-eat, allergen or high-risk zones
- Close off a line during washdown and sanitation
- Reduce splash and overspray onto nearby lines
- Control foot traffic during floor care and deep cleans

Barriers and signs support your procedures; they don't replace lockout/tagout, machine guarding or your safety program.

FROM WALKTHROUGH TO INSTALLATION

You approve a drawing of every board, sign and screen before anything is made.

YOU RECEIVE: layout drawings · a color plan · a written quote with materials, sizes and lead time · an installation record for your files

PLAN YOUR BOARDS

LOCATION OR AREA	ZONE + COLOR	TOOLS ON THE BOARD	BOARD STYLE	LOGO / LANGUAGES	NOTES

HAVE READY: photos of each location · your color program and SSOPs · vector logo files (.ai, .eps, .svg or high-resolution .pdf)
